The purpose of this advisory is to inform the regulated community of the Mojave Desert Air Quality Management District (District) policy in regard to District requests for emissions inventories (including the Comprehensive Emissions Inventory Plan and Report).

Federal, State and District rules and regulations provide that a facility-wide inventory of actual criteria and toxic air pollutants must be submitted to the District, in a format approved by the District, upon District request (District Rule 107(b), H&S Code 39607 & 44341-44342, and 40 CFR 51, Subpart A). The District may request this emissions inventory each year. **Failure to provide an emissions inventory upon the District's request will result in an enforcement action.**
